

MY STICKER IDEAS

Presented by Jordan Collins

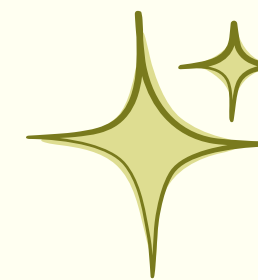

PREFACE

Hello!

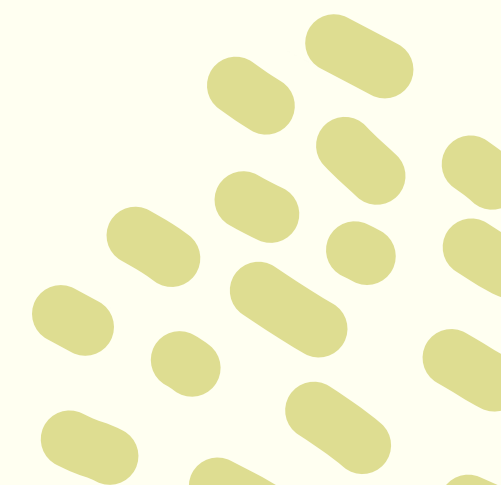

I made some concepts on Canva for the sticker design next year. I will explain all of them on their respective slides, but if we move forward with one I do not mind making an actual design that I can create on my iPad.

I also numbered all of them so we can talk about them and which ones we like or dislike without confusion.

Some of these ideas are jokes and I'm not saying that you should consider them, but I would be pleased if you do.

THE DESIGNS

THE FIRST ONES

I was thinking we could go with a high school like design and do some simple colors with a little jaguar in the middle.

2

Or it can be a more realistic design.

1

We can go with a cartoony leopard like a high school logo.

THE BRICK IDEA

I wanted to be able to represent all buildings, but because all of them are different, I couldn't put just one on a sticker because it would seem like favoritism.

But what do all buildings have in common?
Bricks!

3

THE BRICK IDEA(S)

But I also realize that not all buildings are brick and so I made one specifically for McCollum because it's concrete.

problem solved!

4

JUNGLE JAGUARS

This is my first leopard design and I made 4 variations because I really liked it. The idea of a leopard behind a desk is so cute to me.

#5 and #6 are the best to me

8

THE GENERIC ONES

9

These are generic-looking ones but at the same time, they could be contenders.

10

This one isn't that different from the other one, but the grid is slightly smaller for variety

GENERIC #3

11

I made this one with my hands
please appreciate it.

The colors don't have to be
exactly those, but I decided to go
with something bright and colorful
because that's cute.

GENERIC FLORALS

12

These ones are floral and I think it's cute to have some floral options so I made these to focus on the flower theming some of the buildings have.

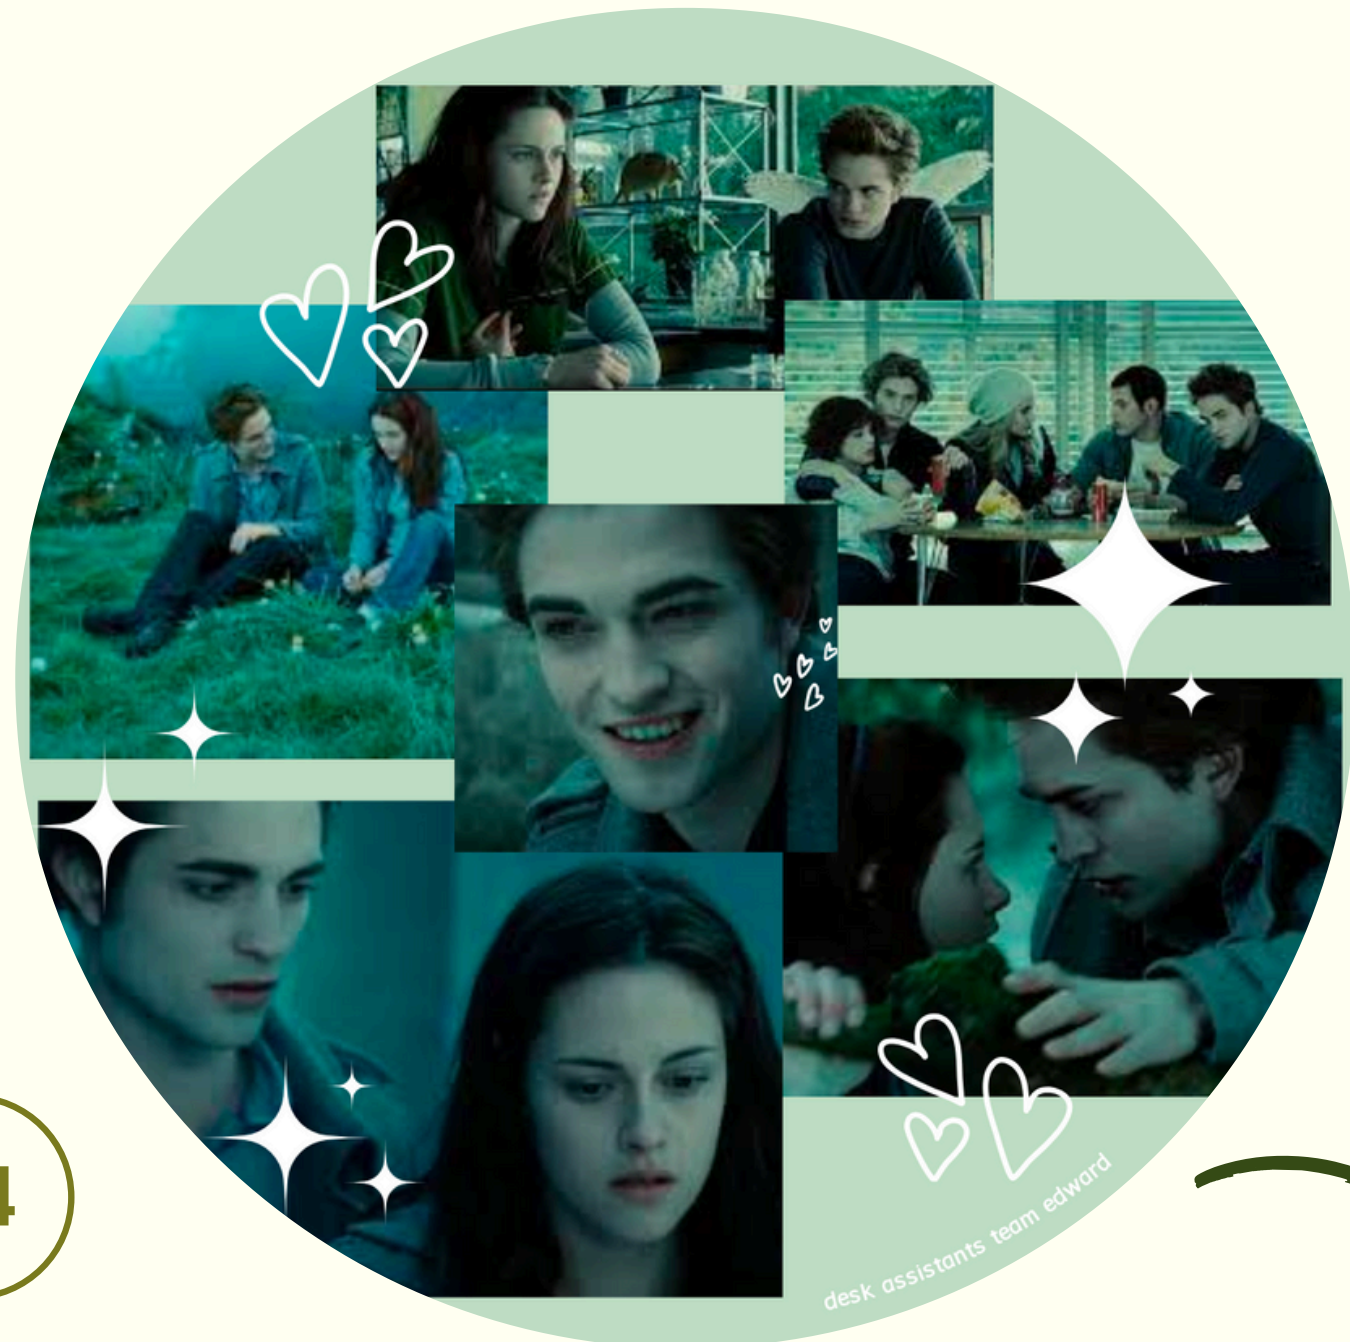

13

THE BEST ONE

I did not forget our conversation about themes, but at the same time, I didn't find any joy in creating ones with music or film theming. So I took our conversation and made a sticker reflecting on the theme for next next year for sure.

says desk assistants team edward

THE LAST

This last idea is giving camp counselor and I think it would be cute to make. It can say anything you want it to say but I think “yes we have tp” is very cute and funny.

I think this one is my favorite.

CONCLUSION

I made so many great (imo) designs. I understand if they don't get chosen but I'm glad I made them. Again if any are chosen I'll make real ones because these are concepts.

I'll list them on the last few slides so its easier to review.

Thanks for reading!

WINNERS!
